

Family-Focused Treatment for Individuals at Clinical High Risk for Psychosis

We are seeking young people concerned about the possibility of developing psychosis and their families (parents and siblings) to participate in family-focused treatments to determine if they can help with the young person's mental health concerns.

You may be eligible for this study if you meet the following criteria:

- Ages 12-25 years old
- At least one family member willing to participate
- Recent change in thinking, behavior, or experiences, such as:
 - Confusion about what is real or imaginary
 - Feeling not in control of your own thoughts
 - Feeling suspicious or paranoid
 - Trouble communicating clearly
 - Experiences that may not be real, such as hearing sounds or seeing things that may not be there
